

Laptop Stand SlimCool

Most unique benefits

- Slimmest laptop stand to carry with. Only 182mm in width when folded up. Yet the support to the laptop is very wide (even 275mm) when the telescopic side bars are spread out.
- Coolest laptop stand in terms of big openings to avoid overheating of the laptop. Telescopic side bars do the trick: when spread out they leave big openings for free air flow under the laptop.
- Double-use padded carry-case. Can be used as a mouse pad and gives a classy protection against damage as corresponding cases for laptops. The surface material is same as used in mouse pads.

Other benefits

- Combined non-slip support for laptop and documents.
- Height adjustable in 6 positions.
- Lightweight aluminium.
